

WORK EXPERIENCE

Software Development Engineer Intern

Sep 2025 — Apr 2026

Pratisthan Software Ventures

Bangalore (On-site)

- Forged secure backend pathways for UK payment systems(UKFPS, BACS, and CHAPS), facilitating the reliable processing of high-value transactions and reducing transaction processing time by 15%.
- Developed **PACS.004** message mapping and return payment logic to enable accurate and reliable transaction reversals
- Designed and implemented **network directory validation** logic and conducted component testing for UK Payments and Collections applications, contributing to a **40% reduction** in payment processing errors.

Web Development Intern

Jul 2024 — Dec 2024

One Snack

Remote

- Incorporated and optimized **5+ responsive web pages** for a gourmet snacks platform using **modern frontend technologies**
- Collaborated** with a cross-functional team of 12 members to deliver **UI features** aligned with product and branding requirements

PROJECTS

Togethr | Unity, Photoshop

ongoing | Itch

- Crafted a **2-player Unity game** with synchronized controls, **teamwork-based** challenges, and dynamic obstacle levels
- Integrated **UI features**, smooth animations, and progress feedback to enhance engagement and replayability

CompileX | React, Judge0 API

Live | GitHub

- Engineered a browser-based IDE supporting real-time code compilation for 4 programming languages, **C++, Python, Java, and JavaScript** with real-time code execution using the **Judge0 API**
- Integrated **8+ core features** including multiple editor themes, input/output console, source code upload and download, fullscreen editing, and persistent multi-playground storage using Local Storage.

ILM KOSH | MERN Stack

Live | GitHub

- Architected a full-stack MERN online book platform for discovering, publishing, and managing digital content with secure **user authentication** and dynamic search functionality
- Structured **15+ RESTful API** endpoints to support publishing, content discovery, and user management.

CODING PROFILES

1. LeetCode (750+ Problems)

2. CodeChef (Highest Rating: 1510, 2 stars)

3. HackerRank (5 stars C++)

SKILLS

Programming Languages	C++, C, C#, Java, JavaScript, Python
Technologies & Frameworks	HTML, CSS, Node.js, Express.js, React.js, Redis, RabbitMQ
Tools & Software	Unity, Blender, Photoshop, Git, GitHub
Fundamentals	Object-Oriented Programming (OOP), DBMS
Familiar With	OpenGL, DirectX

EDUCATION

BE CSE: Chitkara University, CGPA: 8.7/10

Sep 2022 – Present

Coursework: Unity, Photoshop, Blender, MERN, DSA, OOPs, DBMS, OS, AI/ML, System Design

ACHIEVEMENTS

- Participated and showcased my 2D game **Togethr** in **Game Corridor 4.0**
- Winner of **Nexus** — UI/UX Workshop and Competition
- Secured **1st Runner-Up** (2nd Place) in Code Slam: **Hackathon and Codeathon**, competing against 110 teams.
- Advanced to Round 2 of **Adobe Gensolve**, ranking among the top 5 percent of participants.
